Upcoming Event

Increase Student Motivation

Upcoming Webinar:
9 Tips to Increase Student Motivation
May 15, 2021
Presenter: Del Siegle

Lack of motivation is among the most frustrating issues facing parents and educators. Low motivation limits student opportunities and self-fulfillment. In this session, we share suggestions for increasing student motivation based on research over the past 20 years that explored why some talented students are willing to tackle new challenges, while others seem insecure or uninterested.

Research

Survey for Parents with Children in Grades 2–5

Are you the parent/caregiver of a child in 2nd – 5th grade? If so, the National Center for Research on Gifted Education is looking for people like you to complete a survey on parent perceptions of their child’s school experience. The survey should take about 15 minutes to complete and will ask you questions about your perceptions of your child’s academic challenge, academic success, academic placement, and social well-being. The survey is anonymous; however, at the end of the survey you will have an opportunity to have your child complete a related survey on their attitude toward school (this is optional). If you elect to have your child complete a short survey about their attitudes towards school, you will be asked for an email where we can send the link for your child’s survey. For more information visit <https://ncrge.uconn.edu/parent-survey>

For more information, contact: Del Siegle at del.siegle@uconn.edu

Help Us with a Survey for K-6 Teachers

Are you an elementary teacher (K-6)? If so, the National Center for Research on Gifted Education is looking for educators like you to complete a survey on teachers’ perceptions about acceleration. The survey should take about 10 minutes to complete. The survey is anonymous and will help us better understand what factors related to acceleration are important to teachers. For more information visit <https://ncrge.uconn.edu/teacher-survey>
